

Recombinant Human Microtubule-associated protein tau/MAPT K19CFh Protein

Catalog No.: RP00800

Sequence Information

Species	Gene ID
Human	4137
Swiss Prot	Tags
P10636-3	NO-tag

Synonyms

Microtubule-associated protein tau, MAPT, MAPTL, MTBT1, TAU

Product Information

Source	Purification
<i>E. coli</i>	≥ 95% as determined by reducing SDS-PAGE.

Calculated MW	Observed MW
10.2 kDa	10-15 kDa

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from 0.22μm filtered solution in PBS (pH 7.4).

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Tau proteins are proteins that stabilize microtubules. They are abundant in neurons of the central nervous system and are less common elsewhere, but are also expressed at very low levels in CNS astrocytes and oligodendrocytes. When tau proteins are defective, and no longer stabilize microtubules properly, they can result in dementias such as Alzheimer's disease. Tau protein is a highly soluble microtubule-associated protein (MAP). In humans, these proteins are mostly found in neurons compared to non-neuronal cells. One of tau's main functions is to modulate the stability of axonal microtubules. Other nervous system MAPs may perform similar functions, as suggested by tau knockout mice, who did not show abnormalities in brain development - possibly because of compensation in tau deficiency by other MAPs.

Basic Information

Description

Recombinant Human Microtubule-associated protein tau/MAPT K19CFh Protein is produced by *E. coli* Cells system. The target protein is expressed with sequence (Met150-Lys244) of Recombinant Human Microtubule-associated protein tau/MAPT K19CFh Protein (Accession #P10636-3) fused with No tag.

Activity

Shipping

Lyophilized proteins are shipped at ambient temperature. Liquid proteins are shipped at frozen temperature with dry ice. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human Microtubule-associated protein tau/MAPT K19CFh Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
