Recombinant Human FGF-3 Protein

Catalog No.: RP01404

Sequence Information

Species
Human

Gene ID
2248

Swiss Prot
P11487

Tags
No tag

Synonyms
FGF3,HBGF-3,INT2

Product Information

Source
E. coli

Purification
≥ 95 % as determined by SDS-PAGE.

Calculated MW
21.05 kDa

Observed MW
Approximately 25 kDa

Endotoxin
Please contact us for more information.

Formulation
Lyophilized from a 0.22 μm filtered solution of 25mM Tris,1M NaCl, 1mM TCEP,pH 8.0

Reconstitution
Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Fibroblast Growth Factor 3 (FGF-3) belongs to the large FGF family which has at least 23 members. All FGF family members are heparin-binding growth factors with a core 120 amino acid (aa) FGF domain that allows for a common tertiary structure. FGFs are expressed during embryonic development and in restricted adult tissues. They act on cells of mesodermal and neuroectodermal origin to regulate diverse physiologic functions including angiogenesis, cell growth, pattern formation, embryonic development, metabolic regulation, cell migration, neurotrophic effects and tissue repair. Signaling receptors for FGFs are type I transmembrane receptor tyrosine kinases belonging to the Ig superfamily. Four distinct but related classes of FGF receptors, FGF R1, 2, 3, and 4, exist. Through alternative splicing, multiple isoforms for FGF R1, 2 and 3, with distinct ligand recognition profiles, are also generated.

Basic Information

Description
Recombinant Human FGF-3 Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Asp28-Arg212（N-Met）) of human FGF-3 (Accession #NP_005238.1) fused with no additional amino acid.

Activity

Shipping
Lyophilized proteins are shipped at ambient temperature.
Liquid proteins are shipped at frozen temperature with dry ice.
Upon receipt, store it immediately at the temperature recommended below.

Storage
Store at -20℃

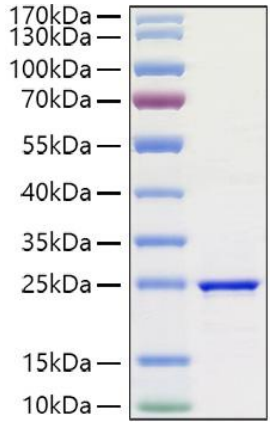

Operational Notes
For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human FGF-3 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
