

Recombinant Mouse TIMP-1 Protein

Catalog No.: RP01853

Sequence Information

Species **Gene ID**
Mouse 21857

Swiss Prot **Tags**
P12032 C-His

Synonyms

Metalloproteinase inhibitor 1,
Collagenase inhibitor 16C8
fibroblast, Erythroid-potentiating
activity, EPA, TPA-S1, TPA-
induced protein, Tissue inhibitor of
metalloproteinases 1, TIMP-1,
Timp1, Timp, Timp-1

Product Information

Source **Purification**
HEK293 cells ≥ 95% as
determined by
SDS-PAGE.

Calculated MW

21.08 kDa 30-35 kDa

Endotoxin

< 0.1 EU/μg of the protein by LAL
method.

Formulation

Lyophilized from a 0.22 μm filtered
solution of PBS, pH 7.4.

Reconstitution

Centrifuge the vial before opening.
Reconstitute to a concentration of
0.1-0.5 mg/mL in sterile distilled
water. Avoid vortex or vigorously
pipetting the protein. For long
term storage, it is recommended
to add a carrier protein or stabilizer
(e.g. 0.1% BSA, 5% HSA, 10% FBS
or 5% Trehalose), and aliquot the
reconstituted protein solution to
minimize free-thaw cycles.

Background

TIMP metalloproteinase inhibitor 1 is also known as TIMP1, a tissue inhibitor of metalloproteinases, is a glycoprotein that is expressed from the several tissues of organisms. This protein a member of the TIMP family. There are four members of the family, TIMP1, TIMP2, TIMP3 and TIMP4. TIMP1 is a glycoprotein with a molecular mass of 28 kDa produced by a wide range of cell types. The glycoprotein is a natural inhibitor of the matrix metalloproteinases (MMPs), a group of peptidases involved in degradation of the extracellular matrix. In addition to its inhibitory role against most of the known MMPs, the encoded protein is able to promote cell proliferation in a wide range of cell types, and may also have an anti-apoptotic function. Transcription of this gene is highly inducible in response to many cytokines and hormones. In addition, the expression from some but not all inactive X chromosomes suggests that this gene inactivation is polymorphic in human females. This gene is located within intron 6 of the synapsin I gene and is transcribed in the opposite direction.

Basic Information

Description

Recombinant Mouse TIMP-1 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Cys25-Arg205) of Mouse TIMP-1 (Accession #NP_035723.2) fused with His tag at the C-terminus.

Activity

Shipping

Lyophilized proteins are shipped at ambient temperature.
Liquid proteins are shipped at frozen temperature with dry ice.
Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Mouse TIMP-1 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
