

Recombinant Human ADPRH Protein

Catalog No.: RP03257

Sequence Information

Species	Gene ID
Human	141
Swiss Prot	Tags
P54922	N-His

Synonyms

ADPRH; ARH1; ADP-ribosylhydrolase ARH1; ADP-ribose-L-arginine cleaving enzyme

Product Information

Source	Purification
E.coli	≥ 90 % as determined by SDS-PAGE.

Calculated MW	Observed MW
41.7 kDa	35-45 kDa

Endotoxin

Please contact us for more information.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

ADPRH belongs to the ADP-Ribosylglycohydrolase family. ADPRH specifically acts as an arginine mono-ADP-ribosylhydrolase by mediating the removal of mono-ADP-ribose attached to arginine residues on proteins. These reactions are related to cell signaling and the control of many cell processes, such as DNA repair and cell apoptosis.

Basic Information

Description

Recombinant Human ADPRH Protein is produced by E.coli expression system. The target protein is expressed with sequence (Met1-Leu351) of human ADPRH (Accession #NP_001116.1) fused with His tag at the N-terminus.

Activity

Shipping

Lyophilized proteins are shipped at ambient temperature.
Liquid proteins are shipped at frozen temperature with dry ice.
Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human ADPRH Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
